

GCC SIGN CUTTING PLOTTERS

SIGNPAL SUPREME SERIES GRC-132S/101S/61

*Unsurpassed
Performance;
Unbeatable Price*

After several years of experience in production and our continuing devotion to Research & Development, The Great Computer Corp. announces its revolutionary cutting plotters in accordance with the demands of sign professionals.

Included in the SignPal Supreme Series are the GRC-132S, GRC-101S and GRC-61 models. The SignPal Supreme Series is specifically designed for professionals with the aim of easy operation and precise and reliable sign cutting at an attractive price point. Some of the features available on the SignPal Supreme Series cutting plotters are as follows:

1. Unsurpassed-quality performance

Utilizing an advanced closed-loop servo control system provides the max. cutting velocity of 1080 mm/sec and the max. acceleration of 42 g without comprising their quality.

2. Accurate alignment to insure proper cutting

To insure the media is properly aligned, the GRC-132S utilizes four pinch rollers and GRC-101S possesses three pinch rollers. This prevents the media from accumulating slack, thus providing an accurate and reliable cut. Each pinch roller may be disabled at any time. In addition, two rows of holes have been added on the platen to assist in alignment.

3. Flexible media loading system

The newly designed media loading system is fully adjustable and created to allow more flexibility than ever before.

4. User-friendly control panel

The creative control panel is designed for easy operation, whether you are an experienced professional or a beginner.

5. Efficient throughput

With the use of advanced hardware and firmware technologies, cutting curves is as fast as cutting straight lines and the throughput is faster than any equivalent models on the market.

6. New configuration

The new attractive configuration of SignPal Supreme Series is not only compact, but also easy to set up.

7. Increased functions

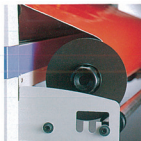

In order to increase your productivity, the SignPal Supreme Series offers two functions: copy and cutting after print with the use of sign making softwares.

8. Cutting range

The SignPal Supreme Series allows you to cut letters as small as 3mm and long plot beautifully.

• User-friendly control panel

• Fully adjustable media loading system
