

# GCC SIGN CUTTING PLOTTERS

With even advanced technology than ever, Great Computer Company (GCC) establishes a new standard for cutting plotter performance with new introduction of the GRC-22 and 23.

The GRC-22 and 23 are technologically and functionally similar, the main difference being that GRC-22 is a desktop model (600 mm wide) while GRC-23 is a large-format version (900mm wide).

Both cutting plotters offer high productivity, top quality performance at an attractive price. From the following features you will discover how sophisticated, professional and cost-effective these cutting plotters are in relation to the competition.

2 SIGNPAL SERIES  
GRC-23/GRC-22

## Major Features Of Signpal GRC 22/23

### High-Speed, High-Quality Cutting

Employing a closed-loop digital servo control system provides the cutting velocity of 1080 mm/sec (42.5ips) and acceleration of 4.2g without sacrificing its accuracy.

### Cuts various materials clearly and accurately

The SignPal series cutting plotters can cut various materials clearly and accurately such as fluorescent vinyl, reflective vinyl, rubber sandblast mask and rubylith with adjustable cutting force ranging from 10 gf to 500 gf, in an increment of 10 gf.

### Free Size Cutting

The SignPal series cutting plotters do cutting sizes ranging from A1 down.

### Small Letter Cutting

Using small cutting blade, the SignPal can precisely make a letter as small as 5 mm in height beautifully.

### Long Sign Cutting

The GRC-22 and GRC-23 equipped with automatic roll feed offers a long sign making capability.

### Movable Origin

To offer the flexibility on use of media sheet, the cutting origin can be located in anywhere by setting up through control panel.

### 1MB/4MB Data Buffer

A 1MB buffer (upgradable to 4MB) enables the SignPal series cutting plotter to free the computer quickly and also can repeat cutting of signs in the buffer.

### HP-GL AND HP-GL/2 Emulation

Emulating HP-GL and HP-GL/2, the SignPal series is compatible with most off-the-shelf software packages.

### Optional Stand (only for GRC-22)

For your convenience, a stand is optional for the GRC-22. The stand is designed specifically to support the SignPal weight requirement and comes with casters for easy mobility.
